

The Brush Light shines in every civilized country of the world. It lights the palace grounds of the Emperors of Japan and Brazil, and can be seen in the streets of the great cities on every continent.

SIMPLICITY IN STRUCTURE AND OPERATION,
BEAUTY AND STEADINESS OF LIGHT,
RELIABILITY UNDER ALL CONDITIONS,
— ARE CHARACTERISTICS OF —

THE BRUSH SYSTEM OF ARC LIGHTING.

BRUSH ARC LIGHTING DYNAMO MACHINE.

It is the universally recognized Standard System of Series Arc Lighting the world over.
The Brush Arc Lights in use far outnumber all others.

PHILADELPHIA, May 2, 1888.

The Brush Electric Company, Edward W. Tisdall, Esq., Special Agent.

DEAR SIR:—In reply to yours of the 25th ult., we are using 355 arc lamps of 2,000 candle power, and eighty incandescent lamps of your make, all of which are satisfactory.

The durability of the dynamos, the goodness of their running power, and few repairs necessary, put the Brush system at the head of all others in our esteem. Yours truly,

JOHN WANAMAKER.

THOUSANDS OF SIMILAR ENDORSEMENTS.

If you contemplate Arc Lighting send for Brush Catalogues and investigate the System thoroughly.
