Charles Francis Brush in storage Toton yard 2007

60098 <i>Charles Francis Brush</i> was the first 60 to be stored in May 2004 at Cardiff Canton, then moved to Immingham and now Toton. She is literally a shell, with all salvageable parts being used to cannibalise the other classmates. Worthy of note it was withdrawn JUST 11 Years after entering service, she was also the 1000th locomotive to be built at the Brush Foundry in Loughborough
